

Difference between Node.JS and Javascript

Java script	Nodejs
Javascript is a programming language that is used for writing scripts on the website.	NodeJS is a Javascript runtime environment.
Java script can only be run in browsers	We can run Javascript outside the browser with the help of NodeJS.
It is basically used on the client-side.	It is mostly used on the server-side.
Javascript is capable enough to add HTML and play with the DOM.	Nodejs does not have capability to add HTML tags.
Java script can run in any browser engine as likeJS core in safari and spider monkey in firefox	V8 is the Javascript engine inside of node.js that parses and runs Javascript
Javascript is used in frontend development.	Nodejs is used in server-side development.
Some of the javascript frameworks are RamdaJS, TypedJS...	Some of the Nodejs modules are Lodash, express etc. These modules are to be imported from npm.
It is the upgraded version of ECMA script that uses chrome's V8 engine written in C++	Nodejs is written in C, C++ and Javascript.
